DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 8, 9, and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Knapp.

Knapp shows a shower head 10 having a housing 20 (see the Note), a jet disk 13 having a front face having numerous apertures 14 from which jets exit; a water inlet 12 admitting water to the housing; and an aerator 15 for aerating water flowing through the shower head, wherein the aerator generates discrete aeration jets and the aerator comprises a hub 16 through which air intake takes place from the front face of the jet disk, wherein the hub has at least one radial air conduit 19 in a vicinity of an end that faces an interior of the housing, and wherein the hub has on its exterior essentially axially arrayed guides 17 guiding the discrete aerated jets. The aerator is configured such that it aerates water upstream from the structure for forming the aeration jets as recited in claim 3.

Note: The space 20 is considered to be the housing because a small amount of water will enter the space in the embodiment of Figure 2 since the outlet of apertures 14 are slightly larger than the inlets of passages 17.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 32 is rejected under 35 U.S.C. 103(a) as being unpatentable over Knapp.

The shower head being configured for side mounting would have been a matter of design choice. Also, the Applicant has not defined their meaning of side-mounting.
